Charitable/Exempt Organizations,
Tax Reform Standing Committee of the
US House of Representatives

Please stop the tax code insanity and implement the Fair Tax Act of 2013, H.R.25. Stop wasting time and money on a comprehensive tax reform that is anything less than this Fair Tax Act. The lobbying and corruption that has gone on in Congress in the taxing systems for decades is shameful. The lack of Congressional corrective action adds to the growing corruption. The mere fact that an honest American is required to spend valuable time and money wading through reams of codes and instruction to fill out a few forms is sheer insanity. Add that burden to a small business concern and one can readily see the crippling disservice and cost to both small and large businesses. The fact that far too many government officials do not even pay their tax bill and are not persecuted destroys any American's confidence in anything related to a tax code. The massive cost of running the IRS and all their investigative and criminal actions is justification enough to replace the existing codes in their entirety with the Fair Tax Act that does not even require the IRS.

Honorable Representatives, you know all the benefits and savings of the Fair Tax Act if you read it. We don't have to go into the long, long list of savings and benefits. We merely add that honest Americans and businesses are struggling under the burden of tons of tax codes and we are all ashamed of your lack of prudent action by not working diligently to pass the Fair Tax Act. Our community is following your specific action and we look forward to your open support of the Fair Tax Act by joining the other 63 Representatives of the US House in cosponsoring H. R. 25. We commend the Honorable Representative Lynn Jenkins for her wisdom and integrity in support the Fair Tax Act 2013.

Thank you for your support to America.
